Profile

A passionate developer who prides himself on adaptability and an eagerness to learn new skills. Having gained experience across a wide variety of trades, I know what it means to be a team player, as well as thrive working on my own.

Skills

Languages: JavaScript, Python, SQL, HTML5, CSS3

Frameworks: React, Node, Express, Django

Databases: PostgreSQL, MongoDB, Mongoose, Sequelize

Etc: MapBox, Cloudinary, Adobe XD, Canvas

Projects

Crema

An app for coffee enthusiasts who want not only the best brewing methods, but a little information on coffee production, where to find the best local roasters, and of course - some curated music to compliment their favorite roasts. Made with MongoDB, Express, React, and Node.

Record-Exchange

Record Trading app built with Node, MySQL, Express, HTML & CSS. Data from the Discogs API.

Citizenly

An app to help people who wish to get more involved in local politics and don't know where to start. Made in React, with a MongoDB backend, Express, and Node.

Starbunker - Winner of the GA Hackathon March 2019. Given the theme of a robot apocalypse - Starbunker is an app to aid the dwindling survivors in finding safe houses. Built in React, with Mapbox & various CSV datasets.

Education

Software Engineering Immersive (formerly WDI) - General Assembly Seattle, WA 2019

Experience

Lot Code Specialist - Herbivore Botanicals 2017-2019

Keeping daily count of made product as well as materials.

Using these figures to assist in production planning and operations.

Para-Educator - Academy for Precision Learning 2014-2017

Worked on a team of educators to implement a personalized curriculum for a classroom of 25+ kids.
